## FORM B - BUILDING

--	--	--	--

### ARCHITECTURAL DESCRIPTION

see continuation sheet

*Describe architectural features. Evaluate the characteristics of this building in terms of other buildings in the community.*

5 Johnson Street is a 2-story, 2-bay dwelling. The cross gable roof is clad in asphalt shingles; brick chimney at roof ridge; partial returns. The wall of the second story flares out over the first story. A large cross-gable wall dormer is located on the south façade - this interrupts the cornice and flares out between the first and second stories. The primary entrance includes an aluminum panel door offset to the right with vinyl 3-pane sidelights and modern storm. Fenestration includes 1/1 vinyl DHS; triangular multi-pane-over-one wood DHS (Queen Anne); narrow paired 1/1 vinyl DHS adjacent to the door; inoperable shutters; paired single-pane vinyl casements in the basement.

### HISTORICAL NARRATIVE

see continuation sheet

*Discuss the history of the building. Explain its associations with local (or state) history. Include uses of the building, and the role(s) the owners/occupants played within the community.*

### BIBLIOGRAPHY and/or REFERENCES

see continuation sheet

Recommended for listing in the National Register of Historic Places. *If checked, you must attach a completed National Register Criteria Statement form.*
